WATER RATES AND WATER QUALITY

Beginning on May 1, 2010, the water rates in the City of Dixon have increased to help pay for the 15 million dollar water treatment facilities that are currently being constructed. We are happy to report that because of the water treatment facilities, the water quality in the City of Dixon is now well within the requirements established by the Environmental Protection Agency.

Water users are currently billed quarterly (once every three months). Therefore, some users will not see the full increase on their bills until the second billing. If you have any questions in regard to your bill, please contact the City of Dixon Water Department at 815.288.3381. We will be happy to clarify any questions you may have in regard to the rates.

Construction update: The water treatment project is being implemented in three phases. Phase one is complete and included installing the water treatment facilities at Well #7 (Nachusa Ave.) and Well #9 (N. Galena Ave.). Phase two is currently under construction and includes Well #6 (N. Jefferson Ave.) and Well #8 (Warp Rd.). Phase Two is scheduled for completion this fall. Phase three which includes Wells #3 & #5 both on River Street will be bid in August with project completion scheduled for late 2011.
