

**Become a part of  
Dixon Public Library's  
NEW  
Coding Club!**

The first session will be limited to youth in Kindergarten and First Grade and will meet weekly on Tuesdays from 3:00-4:30 beginning October 9th for four Tuesdays (October 9, 16, 23, and 30). Parents are welcome to attend with their child as they begin to learn the basics of computer coding and have FUN doing it. Studies have shown the skills learned in coding help children with creativity, problem solving, and logical thinking. Space is limited and spaces are filling up fast so call the library at 284-7261 Ext. 2 to reserve your spot.

**Watch for information about sessions for older youth in upcoming weeks.**
